Class Timing: Friday 6–9 PM

AIDD 30 Days Challenge – Task 3

Q1: Gemini 3.0 mein kaun si nayi behtariyan introduce hui?

Answer :

1. Gemini 3.0 ka reasoning system aur strong ho gaya.
 2. Multi-step planning zyada accurate ho gayi.
 3. Multimodal input (text + image + video + spatial data) ko deep-level par samajhta hai.
 4. Agents ab complex workflows ko kam error ke saath execute kar sakte hain.
 5. Developer tools (AI Studio, Vertex AI, CLI, Antigravity) ke saath integration smooth ho gaya.
 6. Hallucinations kam hogaye, reliability barh gayi.
 7. Data-heavy tasks mein performance improved hai.
 8. Long context tasks ko better handle karta hai.
 9. Practical coding workflows mein precision strong hai.
 10. Overall model developer-focused aur action-driven ban gaya.
-

Q2: Gemini 3.0 coding & automation workflows ko kaise improve karta hai?

Answer:

1. Agents multi-file code likh, test, debug kar sakte hain.
 2. Repetitive coding tasks auto-handle ho jate hain.
 3. Multi-step workflows bina interruption complete ho jate hain.
 4. Better reasoning ki wajah se coding accuracy high hoti hai.
 5. CLI/API integration ziada stable aur fast hai.
 6. Full projects ke liye coding plans generate kar sakta hai.
 7. Automation pipelines streamline hoti hain.
 8. Bugs detect karne aur fix karne ki ability improved hai.
 9. Coding speed noticeable boost leti hai.
 10. Developer productivity overall upar chali jati hai.
-

Q3: Gemini 3.0 multimodal understanding ko kaise improve karta hai?

Answer:

1. Text, images, videos ko ek sath contextually analyse karta hai.
 2. Diagrams aur tables ka structure precise tareeqay se read karta hai.
 3. Spatial data (positions, layouts) ko exact samajhta hai.
 4. Layered visuals ka interpretation reliable ho gaya.
 5. Real-world applications (navigation, designing, instructions) mein performance stable hai.
 6. Agent workflows mein multimodal input seamlessly combine hota hai.
 7. Visual reasoning zyada accurate output deti hai.
 8. Complex instructions ko step-by-step follow karta hai.
 9. Media-rich tasks zyada smooth ho jate hain.
 10. Interaction aur understanding dono realistic feel deti hain.
-

Q4: Gemini 3.0 ke sath kaun se developer tools introduce hue?

Answer:

1. **Antigravity Developer Environment**
 - Fully agent-first IDE jahan agents coding, debugging, terminal tasks, aur browser actions perform karte hain.
2. **Gemini CLI / API (Updated)**
 - Fast, automated, multi-step workflows aur pipelines ke liye optimized.

PART B — Practical Task

Task:

Aapko Gemini CLI ka use karte hue model ko latest version **Gemini 3.0** par update karna hai.

Steps:

1. Terminal open karo.
2. `/model` command run karo.
3. Available models list hogi.
4. Gemini 3.0 select karo.
5. Update confirm hoga.
6. CLI ko update nahi karna — sirf model update hoga.
7. Update complete hone par success message milega.
8. Apne system ka Node version check karo.

9. Gemini CLI version check karo.
10. In dono ka screenshot submit karna hai.

Screenshots

Check Installed Node & Gemini CLI Version:

```
C:\WINDOWS\system32\cmd. x + v
Microsoft Windows [Version 10.0.22621.4317]
(c) Microsoft Corporation. All rights reserved.

C:\Users\win>node -v
v24.11.1

C:\Users\win>gemini -v
0.16.0

C:\Users\win>
```

Successfully Updated Gemini 3.0 Model

```
Gemini - win x + v
> GEMINI

Tips for getting started:
1. Ask questions, edit files, or run commands.
2. Be specific for the best results.
3. Create GEMINI.md files to customize your interactions with Gemini.
4. /help for more information.

> /model

You are running Gemini CLI in your home directory. It is recommended to run in a project-specific directory.

Select Model
Gemini 3 is now enabled.
To disable Gemini 3, disable "Preview features" in /settings.
Learn more at https://go.gle/enable-preview-features.

When you select Auto or Pro, Gemini CLI will attempt to use gemini-3-pro-preview first, before falling back to gemini-2.5-pro.

1. Auto
Let the system choose the best model for your task.
• 2. Pro (gemini-3-pro-preview, gemini-2.5-pro)
For complex tasks that require deep reasoning and creativity
3. Flash (gemini-2.5-flash)
For tasks that need a balance of speed and reasoning
4. Flash-Lite (gemini-2.5-flash-lite)
For single tasks that need to be done quickly

To use a specific Gemini model on startup, use the --model flag.
(Press Esc to close)
```
